**THE NATIONAL ARCHIVES  
NATIONAL ARCHIVES AND RECORDS SERVICE  
GENERAL SERVICES ADMINISTRATION**

WASHINGTON: 1969

## INTRODUCTION

On the 26 rolls of this microfilm publication is reproduced an alphabetical card index to the compiled service records of Confederate soldiers (1) who served in military organizations raised directly or otherwise formed by the Confederate Government or (2) who served in some capacity that did not involve belonging to a unit at or below the regimental level. The index and the compiled service records are part of Record Group 109, War Department Collection of Confederate Records.

The first of these two classes of military personnel served in cavalry, artillery, and infantry units, some of which were raised initially as units of the Confederate States Army and some of which were the result either of bringing together small units that had been raised separately by two or more States or of consolidating units from different States that needed to be strengthened because of losses in personnel or other deficiencies. This class also included personnel in special corps (Corps of Engineers, Nitre and Mining Bureau, and Signal Corps) and the bands.

The second class of personnel included general officers, officers and enlisted men of the so-called staff departments (such as the Adjutant and Inspector General and the Quartermaster General), members of army corps, division, and brigade staffs, and various appointees with a special status such as aides-de-camp, military judges, chaplains, agents, and drillmasters.

Each index card gives the name of a soldier, his rank, and the unit in which he served. There are cross-references for names that appeared in the records under more than one spelling and for service in more than one unit or organization.

The supposedly correct name of a soldier who served in the Confederate Army in organizations not identified with any one State may not appear in this index for several reasons. First, he may have served under a different name or used a different spelling of his name. Second, a proper record of his service may not have been made by the Confederate Army; or, if made, it may have been lost or destroyed in the confusion that often attended the initial mobilization, subsequent military operations, or the final surrender of the Confederate military forces. Third, the references to the soldier in the original records may be so vague that it was not practicable to determine his correct name or the unit in which he served. In addition, he may have

## NATIONAL ARCHIVES MICROFILM PUBLICATIONS

served in a State organization but the commonly known title of the unit does not include the name of the State.

The compiled service records to which this index applies are reproduced in Microcopy 258, Compiled Service Records of Confederate Soldiers Who Served in Organizations Raised Directly by the Confederate Government and Microcopy 331, Compiled Service Records of Confederate General and Staff Officers and Nonregimental Enlisted Men.

The records reproduced in Microcopy 258 consist of a jacket-envelope for each soldier, labeled with his name, his rank, and the unit or special corps in which he served. The jacket-envelope typically contains (1) card abstracts of entries relating to the soldier as found in original muster rolls, returns, rosters, payrolls, appointment books, hospital registers, Union prison registers and rolls, parole lists, and inspection reports; and (2) the originals of any papers relating solely to the individual soldier.

The records reproduced in Microcopy 331 consist of a jacket-envelope for each soldier, labeled with his name, his rank, and usually the capacity in which he served. The jacket-envelope typically contains (1) card abstracts of entries relating to the soldier as found in original appointment registers, lists of staff officers, lists of quartermaster or commissary officers, registers of medical personnel, returns, muster rolls, inspection reports, receipt rolls, hospital registers, Union prison registers and rolls, parole lists, and oaths of allegiance; (2) references to special orders, other orders, and miscellaneous original or published records; and (3) the originals of any papers relating solely to the individual soldier.

The compiled service records reproduced on Microcopy 258 are arranged according to an organizational breakdown ending with the regiment or the independent battalion or company. Under each unit the service records are arranged alphabetically by surname of soldier. In the case of a special corps whose personnel did not belong to a unit at or below the regimental level, there is a separate series of service records arranged alphabetically by surname of soldier. Another series for the personnel of bands is similarly arranged. The records reproduced on Microcopy 331 are also arranged alphabetically by surname of soldier.

Two separate indexes may be used to locate the compiled service record of a soldier who served in organizations raised directly or otherwise formed by the Confederate Government or who served in some capacity that did not involve belonging to a unit at or below the regimental level. One is the index reproduced in this microcopy. The other, which duplicates the information in this index, is a "consolidated" or master card

index (reproduced as Microcopy 253) that contains the names of all Confederate soldiers found in compiling the service records, regardless of whether the service was with a unit furnished by a specific State, with a unit raised directly by the Confederate Government, or as a staff officer. Unless the unit in which a soldier served is known, his compiled service record can be located only through the use of one of these indexes, both of which are in Record Group 109.

The compilation of service records of Confederate soldiers was begun in 1903 under the direction of Brig. Gen. Fred C. Ainsworth, head of the Record and Pension Office of the War Department. Abstracts were made from documents borrowed by the War Department in an effort to obtain as nearly complete military service records as possible. The abstracts made from the original records were verified by a separate operation of comparison, and great care was taken to ensure that the abstracts and the indexes were accurate.

Reproductions of specific compiled service records corresponding to entries in the index reproduced in this microcopy may be obtained from the National Archives for a fee. Requests for such reproductions should give the organizational unit, special corps, or other capacity in which each soldier served, exactly as shown in this index.

The National Archives has other records that may contain information relating to a specific Confederate soldier. Among them are the various series of compiled service records of soldiers in organizations from individual States that have been reproduced in separate microfilm publications.

Another series is made up of the card abstracts and personal papers that were accumulated by the War Department to be interfiled with the regular series of compiled service records but, for one reason or another, were not interfiled. The usual reason was that the information was insufficient or contained discrepancies and could not be positively identified with any soldier for whom there was a compiled service record. Other reasons were that no compiled service record had been established on the basis of regular service records and that the item did not provide enough evidence to justify establishing one. This series of card abstracts and personal papers, which is arranged in alphabetical order by name of soldier, is reproduced in Microcopy 347. The series is not indexed.

Sometimes supposed Confederate military service is shown by the records to have been service in a civilian capacity, as in the case of Government employees. Evidence of such service, or of having aided the Confederate cause as a civilian in some other way, may sometimes be obtained from a series of records known as the "Citizens File," consisting of Confederate

NATIONAL ARCHIVES MICROFILM PUBLICATIONS

documents each of which relates to a specific person and reproduced as Microcopy 346. The documents are arranged alphabetically by name of person and are not indexed.

Other information about the activities of Confederate civilians is contained in a similar unindexed series of documents accumulated by Union provost marshals and known as the "Provost Marshal File." The documents have been filmed under the titles, Union Provost Marshals' File of Papers Relating to Individual Civilians (Microcopy 345) and Union Provost Marshals' File of Papers Relating to Two or More Civilians (Microcopy 416).
